

Android Control Card Y50

Product Specification

Version: Ver.2.2

Statement

Dear user friend, thanks for choosing SHENZHEN SYSOLUTION TECHNOLOGY CO.,LTD referred to as Xixun Technology) as your LED advertising equipment control system. The main purpose of this document is to help you quickly understand and use the product. We strive to be precise and reliable when writing the document, and the content may be modified or changed at any time without notice.

SHENZHEN SYSOLUTION TECHNOLOGY CO., LTD

Product Introduction

Xixun Y50 can release programs and display control through PC, mobile phone, Pad and other user terminals, support wireless transmission, and can avoid the trouble of wiring, and configure the wireless network like a router; Support the release of access to the cloud platform, and easily realize the remote cluster management and control of the display screen; Hardware and software design fully consider user deployment, operation and maintenance scenarios, making deployment easier, operation more stable and maintenance more efficient; With safe and stable function design, it can save space and reduce wiring for users. It can be used in small load scenes such as car screen, small traffic screen, community screen, lamp pole screen, etc.

Y50 series adopts industrial grade quad core processor, integrates four cortex-a35, dual core mali-g31 GPU, quad core main frequency 1.5GHz, can withstand 90 °C high temperature and can operate stably, and the memory supports 1gb+8gb (compatible with 2gb+16gb) LPDDR3. The chip can support GSM, WCDMA, TD-SCDMA, EVDO, TDD-LTE, FDD-LTE and other systems. It is a highly integrated product.

Function Characteristics

1. The information release platform passes the third level Filing Certificate of information system security of the Ministry of public security, and provides copies and seals;
2. The materials of the information transmission platform have passed the approval of audio-visual program of information network communication, and copies and seals are provided
3. Have the national quality inspection stable and qualified product certificate, and provide copies and seals;
4. Two Gigabit network ports are output, and one network port is used as backup to ensure the stability of image transmission;
5. Support the external connection of eight element environmental sensor R68 through 485 interface to display environmental information without secondary development;
6. Support the external Lora synchronization module to ensure the synchronization of multi screen display;
7. Support two-way remote power-off, one control panel switch and one control street lamp switch;
8. Support optional 4G modules. The models of modules in different countries are different. Please provide the country of use for shipment. Support optional 4G modules. Different models fits for different countries. Please confirm the country before shipment;
9. Offer FCC、CE certification;
10. Lora wireless timing multi screen synchronization;

11. Onboard WiFi module for wireless communication;
12. Support AP mode and Station mode;
13. Support secondary development and remote cluster control of cloud platform;
14. Built in web server, it supports local web page production, program release and display control of PC, mobile phone, pad and other user terminals, cluster remote program release and display control, and cluster remote monitoring of screen status;
15. Powerful processing performance, 4-core processor, main frequency 1.5GHz, support 1080p video hard decoding, 1GB running memory;
16. 8GB internal storage space, 4GB available to users;
17. The user terminal connects to the WiFi hotspot of Y50. The default SSID is "SN number" and the default password is "12345678";
18. Support GPS timing / timing;
19. Dual ports with super load capacity, resolution 1280*720;
20. It can automatically adjust the brightness of the display screen with a brightness sensor;
21. Support to play programs according to the program list;
22. The timing switch, volume and brightness can be set centrally through the management system;
23. Support USB camera;
24. Support NTP precise automatic timing;
25. Software kit: AIPS4.0 Cloud publishing platform, PC software LedOk Express, mobile APP: LedOK Kit.

Product Appearance

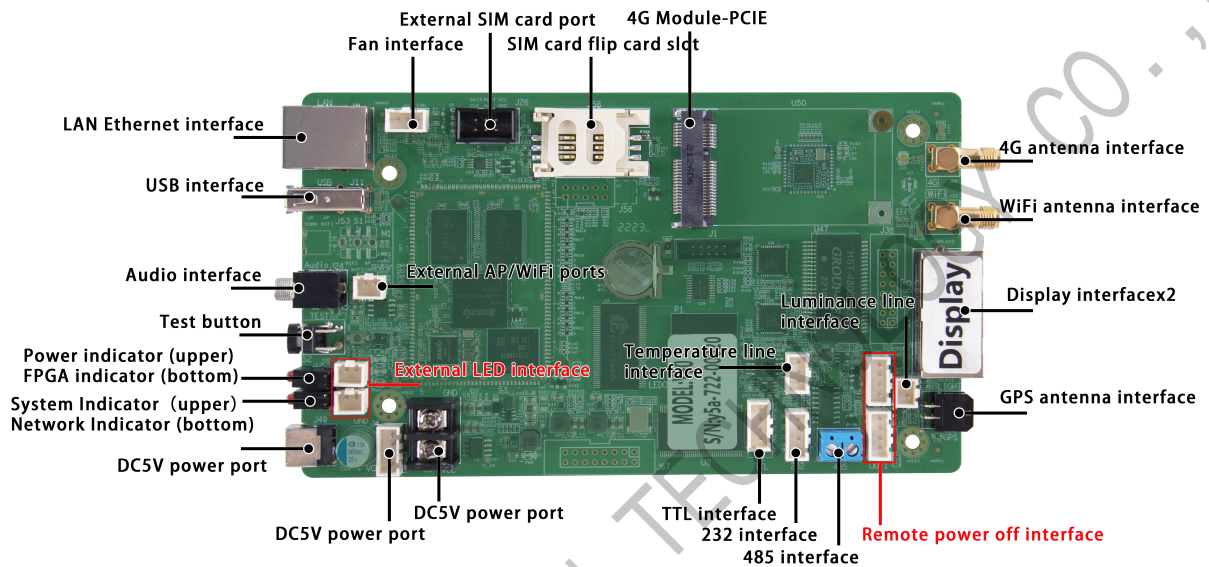

Product Parameters

Features	Description	
Type	Y50-WIFI (no 4G) /Y50-NA、 Y50-EU、 Y50-LA、 Y50-G、 Y50-J	
Pixel	Y50: 920,000 pixels, resolution 1280 (w) *720 (h)	
Communication mode	Ethernet port、 WiFi、 USB	
CPU	Cortex-A35 4 core main frequency1.5GHz	
GPU	Mali-G31MP2 OpenGL ES3.2, Vulkan 1.0, OpenCL 2.0 Dvalin-2EE	
System memory	8GB Emmc+1GB LPDDR3	
Operating system	Android 9	
WiFi	IEEE 802.11b/g/n 2.4G	
GPS	GNSS GPS/Beidou/Glonass	
Other interface support	<ol style="list-style-type: none"> 1 channel stereo audio output 1 USB2.0 port Support play program through USB 1 RS485 port, 1 RS232、 1 TTL serial port. Connect to light sensor or other sensors, as well as connecting to other modems to realize other functions. 	
Configuration software	LedOK Express	
Support frequency band		
Type	3G/4G (optional)	Certificate

Working Conditions

Working parameters	
Working voltage (V)	5.0V/12V
Working current (A)	0.9A Max: 3A
Maximum working power consumption (W)	10
working temperature (°C)	- 40°C ~ +95°C
Storage temperature (°C)	-40°C ~75°C, Recommend 5°C ~35°C
Humidity of working environment (%)	10% ~ 90%, No condensation
Size (mm)	170cm×99.5cm

1. It is recommended to use an independent (12V/3A or above) power supply for the control card;
2. High working temperature will cause a sharp decline in power efficiency. If the control card and the module share the same power supply, please ensure that the control card has a stable voltage and a reasonable actual current supply.

Dimension Drawing

Unit: mm

Installation dimensions of the bare plate

SHENZHEN SYSOLUTION

Parts

Standard accessories	Size/Quantity
WiFi patch antenna	1.5m*1
4G sucker antenna	3m*1
Optional accessories	Accessory function
Humidity lineRH1	Used to detect the humidity of the current external environment
Brightness lineRL2	Used to sense the brightness of the current environment
Optional multi-function card RS5 integrated synchronization module, 5-way voltage detection, door opening and closing and smoke interface (optional RD1 door sensor, RM1 smoke sensor)	Power detection
Eight in one environmental sensor R68	Temperature, humidity, illumination, PM2.5, PM10, noise, wind speed, wind direction
G11 GMous multimode	GPS Positioning module
Matching accessories (the above options, according to the order needs to place another corresponding model)	

Notes

1. It is strictly forbidden to disassemble and assemble the product by yourself.
2. It is strictly forbidden to plug and unplug the SIM card with power.
3. It is strictly forbidden to use improper voltage for power supply.
4. It is strictly forbidden to share the 200w/5v switching power supply of the screen to supply power to the card, which will lead to unstable system operation and low horn sound.
